

Please allow XM Satelitte Radio Instant weather and traffic to continue. I am a custom=mer of theirs and it is extremely helpful and useful to me to recieve this information when I need it. I think that compition in America is good and produces a better product for the consumer. If the National Association of Broadcasters want to stiffle XM Satelllite Radio, let them produce a better product NOT lobby Congress to do their work for them. PLEASE allow XM Instant weather and traffic to continue. I do pay for this service and love it. Thank you for listening.

PS: Please know that the Lord Jesus Christ truly loves you!

Sincerely.
Chris Schroeder
